

INDUSTRIAL VACUUM CLEANERS FOR OIL MIST

The **OIL MIST LINE** was created as a result of the constant focus on clean air, health and healthiness in the workplace.

It is a line of vacuum cleaners dedicated to the **extraction of oil mists for machine tools**. Specifically designed to handle difficult applications combined with a considerable amount of oil mist consisting of small particles. Such conditions are typical of high-speed spindle rotational machining and high coolant pressure.

After diligent research and studies, the OIL MIST line proves to be the ideal solution for heavy-duty applications with significant amounts of pollution to be eliminated with a simple and effective solution management system.
